Synopsis

How was it that the Flower of Life in Time came to be and returned to planet earth?

I first saw the image known today as the Flower of Life, in what was most likely seen as an obscure "new age" text back in the 90s, first published in 1994. The title goes something like this: "Nothing in this book is true, but it's exactly how things are".

This book describes, among many other topics, a variety of the basic geometries that produce the Seed of Life, the Tree of Life, the Fruit of Life etc. The Flower of Life forms the matrix with which the platonic/perfect solids are born, and when these are all united together and interlocked, this then forms the Metatron's cube.

From this I went on to include the visualizations of geometry in my meditations, activating these geometries within my chakras, with chants and specific vowel sounds. During this time I participated at the Healing Sounds Intensive in Colorado (www.healingsounds.com).

relation of musical notes to time cycles

Then, a few years later on, were published the Flower of Life books of Drunvalo, both monumental books that expand on so many

levels these Flower of Life teachings, and for me more meditations followed through studying these books. Particularly did I focus on the Merkabah geometry, and from this practice a great remembrance of ancient wisdom and revelations came to me, as I am sure did with most kin that read through these books.

I went on from this to become involved with the "13 Moons of Peace" movement (calendar change advocates - www.lawoftime.org), which bases itself on realigning to the 7-day week (Seed of Life / 7 plasmas) within the proper 28 common law month, making 13 months of 28 days per year (+1 day) = 365. This concept was introduced to me by the pioneering work of Dr José Argüelles, and his book "The Mayan Factor".

* I call the 28-day cycle a "[Geometric month](#)" in my own research

This all eventually led to me starting my own independent research, and it was from this that the "Flower of Life in Time" came to be. Through deeply studying the structure of the 19-year cycle and ratios through time I saw first the ratio of 7:12 (12 around 7), and then later the ratio of 1:6:12 that unlocked its fractal core, to form a Cube-Dodecahedron, sharing a common centre, merged to form the geometry of 19 years. *see graphic: "Meta 19" on [page 21](#)

This research then was paramount in making possible my 19 years study of cycles of time (using the StarCalc program). From this place of understanding time through both the geometric & organic based systems, I mapped over 1000 of these 19 years cycle and showed their fluctuations around the primary 19 years base formula... *Organic term was developed later through my long term study of the Mayan Long

Count of 1872000 days, and for example includes the Fibonacci ratio and therefore Phi = 1.618. ($144 / 89 = 1.618$)

*New information coming to light *

In the past few years, there has been new information coming to light: Utilizing things like the atomic force microscopy, the image of a "complex organic molecule" looking identical to a Fruit of Life was made public.

There are several pages online now showing photographic evidence, which provide many examples of the Flower of Life in art and architecture around the planet, the question now being: Is there a place around the planet where the Flower of Life geometry does not exist?

see: Traditions that use the 19-year cycle (calendars)

Then, more recently, there was also the nature of micro-tubules inside neurons within our bodies that have been hypothesized as "where the quantum world and the classical world of space-time meet". Relating therefore to new theories of the holographic / fractal structure of our beings, and the origins of consciousness.

All in all, we are seeing a resurgence of epic proportions!

by far the greatest and most profoundly unquestioned is the instrument and institution known as the Gregorian Calendar.” Jose Arguelles

CHAPTER 2

Shifting Frequencies (formula)

symptoms, not going to the root cause: a really badly thought out calendar that has its sole origins in the foundations of Rome.

Of course, those that wish to follow the tradition of this Roman calendar are free to do so, but it should not be the standard for the world, if for instance the idea is for us to be living in a potentially democratic world based on the most advanced and accurate scientific understandings.

The most common naturally developed timing system is the 19-year cycle (* the most ancient record of its existence going back millennia), whereas the Gregorian became used due to the expansion of the Roman empire, and only became known in its current form in 1582.

Unless we are all meant to be happily maintaining this system of hierarchically dominant, masculine top-down ruled calendar institution...

It's quite obvious from all the evidence that this is not the wish of the majority of people on the planet, unless the belief / illusion is, we live on "planet Vatican", which by all measurements we don't - there is a multitude of traditions, a Rainbow tribe!

It does not benefit international peace between spiritual faiths, when the Vatican system in fact has a veto position on time. Without the blessings of the Pope, no change can be made to the world calendar - is that democratic? Surely not.

Behind closed doors, all religions use these geometries and hidden teachings to further the spread of their teachings, while the majority of the population are supposedly left wondering. Is there a hidden mystery waiting to be remembered? The result of hoarding secrets within vast vaults under lock and key.

If we leave it to the major religions to contemplate the deeper mysteries, leave it to the priests to commune with the divine, we are left in the position of being lowly sinners; this Sin being a symptom of the historical separation from nature, which these false religious institutions have promoted for centuries, dishonouring the goddess all the while (they hung the last witch at the

beginning of the last century, here in Scotland).

The key natural values that the 19-year cycle represents, are about living in harmony with the natural cycles, a return to balance between woman and man, sun and moon.

The Gregorian corruption of the time lines, of double standards, of hidden teachings only known to the select few, is ending... because you see "they" know of these teachings, as they would not incorporate them into all of their architectures and manuscripts without reason... It's all hidden in plain sight, as that is part of their ritual to put it under our noses, yet pretend it's all mumbo jumbo.

The false age of hypocrisy shall be seen for what it is, a fraud, and the truth shall set us free!

Time shall unfold its true flower to us all :-)

How many more years til we change the tune ??

Afterword

Time is indeed of the essence (but only in a world caught in the illusion of linear time, would there be such a rush to fix something that is so apparent as aligning to natural time, and valuing ecological principles over economic profits).

Yet the time is fast approaching when the rivers and oceans, the very air we breathe, and environment we live in reach their toxic limit.

On a metaphorical level, it can be plainly seen that not aligning with a naturally based timing system has led to a planetary society that puts profit before people, profit before planet, and we pay the price...

So instead I would say...

Time is the essence ! ... numbers !

i.e. without correctly living in naturally based time, we are living in a broken system that requires constant fixing.

Traditions that use the 19-year cycle (calendars)!

Examples of ancient cultures using a 19 year cycle (with no mention of flower of life geometry):

Babylonian (19 years of 12 moons, plus 7 moons, 6x Adaru, 1x Ululu)

Bahai (19 years made up of 19x19 days, plus 4 or 5 extra days)

Byzantine (Easter computus = 19 year cycle, 19x12 +7 = 235 moons)

Chinese (19-year cycle, 12x12 moons + 7x13 moons)

Christian (Easter computus = 19 year cycle, 19x12 +7 = 235 moons)

The Flower of Life in Time
19 year cycle = 6939.6 days

Greek (19-year cycle is known as the Metonic cycle, after Meton 432BC)

Hebrew (19 years of 12 moons, plus 7 moons, Adar 1 & Adar II)

Macedonian (19 years of 12 moons, with 7 intercalary moons)

Mayan (difference between inscriptions marking 6940 days, 19 years)

"Evidence for the metonic cycle on Copacabana Stela A is associated with a text naming the Sun God (T1010) and the Moon Goddess (C7-D7; Pl. 20). Pairing their names in this fashion recalls couplets in the Chilam Balam of Tizimin that say *k'inil-uil*, meaning "the period of the sun, the period of the moon" (Edmonson 1982b:264 n. 10). As noted in Chapter 1, the contemporary Maya often pair the sun and the moon. On Stela A the pairing seems to refer to the sun and the full moon, for the Initial Series date of 9.14.19.8.0 12 Ahau 18 Cumku (1/28/731) falls on the full moon, and it is followed by the date 4 Ahau 18 Muan (9.14.19.5.0; 11/29/730), also the day of the full moon (a date recorded on Stela H). The Calendar Round 4 Ahau 18 Muan at E2-F2 may refer to the metonic cycle, because it is 9.15.0 days (6,940 days) after the Katun ending 9.14.0.0.0 6 Ahau (a date not given in the text). As Heinrich Berlin (1977: 75 -76) notes, this interval gives a value close to the solar year (365.263 days) and the lunar month (29.532 days)." p117 "Star Gods"

Norse (19-year cycle, using younger Futhark of 16 runes, plus 3 more)

Hindu calendar

"A lunar month has 29 or 30 days (according to the movement of the moon)."

"Extra Month, or *adhika māsa* (māsa = lunar month in this context) falls every 32.5 months."

TESLA 'HARNESSES' COSMIC ENERGY

[Philadelphia Public Ledger](#), November 2, **1933**

"Inventor Announces Discovery of Power to Displace Fuel in Driving Machinery - Calls Sun Main Source

A principle by which power for driving the machinery of the world may be derived from the cosmic energy which operates the universe, has been discovered by Nikola Tesla, noted physicist and inventor of scientific devices, he announced today.

This principle, which taps a source of power described as "everywhere present in unlimited quantities" and which may be transmitted by wire or wireless from central plants to any part of the globe, will eliminate the need of coal, oil, gas or any other of the common fuels, he said.

Dr. Tesla in a statement today at his hotel indicated the time was not far distant when the principle would be ready for practical commercial development.

Asked whether the sudden introduction of his principle would upset the present economic system, Dr. Tesla replied, "It is badly upset already." He added that now as never before was the time ripe for the development of new resources. While in its present form the theory calls for the development of the energy in central plants requiring vast machinery, Dr. Tesla said he might be able to work out a plan for its use by individuals.

The central source of cosmic energy for the earth is the sun, Dr. Tesla said, but "night will not interrupt the flow of the new power supply."
