Synopsis

How was it that the Flower of Life in Time came to be and returned to planet earth?

I first saw the image known today as the Flower of Life, in what was most likely seen as an obscure "new age" text back in the 90s, first published in 1994. The title goes something like this: "Nothing in this book is true, but it's exactly how things are".

This book describes, among many other topics, a variety of the basic geometries that produce the Seed of Life, the Tree of Life, the Fruit of Life etc. The Flower of Life forms the matrix with which the platonic/perfect solids are born, and when these are all united together and interlocked, this then forms the Metatron's cube.

From this I went on to include the visualizations of geometry in my meditations, activating these geometries within my chakras, with chants and specific vowel sounds. During this time I participated at the Healing Sounds Intensive in Colorado (www.healingsounds.com).

relation of musical notes to time cycles

Then, a few years later on, were published the Flower of Life books of Drunvalo, both monumental books that expand on so many

levels these Flower of Life teachings, and for me more meditations followed through studying these books. Particularly did I focus on the Merkabah geometry, and from this practice a great remembrance of ancient wisdom and revelations came to me, as I am sure did with most kin that read through these books.

I went on from this to become involved with the "13 Moons of Peace" movement (calendar change advocates - www.lawoftime.org), which bases itself on realigning to the 7-day week (Seed of Life / 7 plasmas) within the proper 28 common law month, making 13 months of 28 days per year (+1 day) = 365. This concept was introduced to me by the pioneering work of Dr José Argüelles, and his book "The Mayan Factor".

* I call the 28-day cycle a "[Geometric month](#)" in my own research

This all eventually led to me starting my own independent research, and it was from this that the "Flower of Life in Time" came to be. Through deeply studying the structure of the 19-year cycle and ratios through time I saw first the ratio of 7:12 (12 around 7), and then later the ratio of 1:6:12 that unlocked its fractal core, to form a Cube-Dodecahedron, sharing a common centre, merged to form the geometry of 19 years. *see graphic: "Meta 19" on [page 21](#)

This research then was paramount in making possible my 19 years study of cycles of time (using the StarCalc program). From this place of understanding time through both the geometric & organic based systems, I mapped over 1000 of these 19 years cycle and showed their fluctuations around the primary 19 years base formula... *Organic term was developed later through my long term study of the Mayan Long

Count of 1872000 days, and for example includes the Fibonacci ratio and therefore Phi = 1.618. ($144 / 89 = 1.618$)

*New information coming to light *

In the past few years, there has been new information coming to light: Utilizing things like the atomic force microscopy, the image of a "complex organic molecule" looking identical to a Fruit of Life was made public.

There are several pages online now showing photographic evidence, which provide many examples of the Flower of Life in art and architecture around the planet, the question now being: Is there a place around the planet where the Flower of Life geometry does not exist?

see: Traditions that use the 19-year cycle (calendars)

Then, more recently, there was also the nature of micro-tubules inside neurons within our bodies that have been hypothesized as "where the quantum world and the classical world of space-time meet". Relating therefore to new theories of the holographic / fractal structure of our beings, and the origins of consciousness.

All in all, we are seeing a resurgence of epic proportions!

A Planetary Awakening !

Chapter 5

Year 1933 (conspiracy facts)

Chapter 5

Year 19:33 (conspiracy facts)

As we reach this point in this work, I'm going to take a slight de-tour to relate how these mystic numbers have found their way into the enactments of the US senate, debating financial resolutions, as they would like you to think anyway.

I'm relying on my natural fortitude for understanding numbers, having studied accountancy at school, because I was good with numbers. Yet I could not allow myself to get caught up in all the corruption and lies that these systems of financial governance produce.

It's quite easy to see that their system of numbers doesn't add up...

Equality is based on the mutual sharing of resources. If those said resources are not being mutually shared, then equality does not exist >> therefore the financial system there to maintain the equilibrium of equality has failed.

I would not have any part of their "divide and conquer" mentality; instead I studied the current system and found so many holes in it that I could not believe that the majority of people have fallen for such a fake system of resource management.

Such is the nature of thousands of years of suppression by the rich and glamorous, the demonizing of the poor... There seems a half and half cut between those with just enough, wishing to either help the poor or those with less than them in any way they can, and the other half that idolise the rich and would do anything to become one of the glamorous rich folks... oh dear.

Apparently we live in a democratic republic, or at least a planet that is heading in that direction, yet how can it truly manifest such an intention, if there remains a gremlin in the works - the Gregorian calendar?

Hypocrisy/history has a way of repeating the same cycles over and over again, until the lesson is learned, and given the time matrix under which we currently live, we are all slaves to its roots of wealth theft.

Anyone been into the vaults under the Vatican recently? Perhaps had a nice cup of tea with the Queen of England and discussed how poverty could be ended in its entirety?

They just play the game of being noble "rulers", because that's what their followers want to follow - empty intentions that they never intended to follow through.

It's very easy to see and prove that their real intentions are population reduction, a surveillance state, and more and more controls over each and every one of us under their umbrella of protecting us.

Yet the threats, from which they say they are protecting us, are caused by their own international policies of stealing resources to prop up their overweight countries.

Never do they consider that they have got it all wrong, or if they do, then after they realise, in order to really change it for the good, they would have to give up their entirety in excess lifestyles, and beg forgiveness for all the thousands of years of lies.

What is left for them to do, is a gradual release of information, and slow retreat into obscurity... but as slow as they can possibly manage... so slow the planet itself could be polluted beyond the point of no return before they "decide" it's time to pull the stopper off...

Gregorian calendar reformed AD 1582 by Pope Gregory XIII
Present global time standard of 'irregular' measure / Moon power hidden

And on it goes... The world management team placing bets on the future of all of us, with their weapons industry and pharmaceutical cartel keeping their pockets full to the brim with blood moneys...

Every war there ever was, was a decision made and followed, a ritual blood sacrifice in the name of hierarchical domination.... Because if they didn't do it, someone else would and they don't want to be the losers... Can't think beyond the games of us and them!

And on and on it goes... It basically can be summed up as a major psychological problem: They make it up as they go along, and as long as they chose who gets the position of world "leaders", they don't care about the laws, as the laws mean nothing.

How many laws does it take before we realise you can't control what other people do with their lives... If they want to make a law that works, how about leading by example!

So, now here is a wee bit of mathematical low-down on the insane policies of the pathological unstable... cue the introduction of the Federal Reserve, which is a privately owned institution, that's pretty MENTAL!

It was sworn into law in the year 1933
(19 year Flower, 33 Diamond matrix)

I remember when I first found this out it was like a dagger in the heart. They of course know the power of numbers, as I have shown in the short geometry section.

The 19 stands for the metonic cycles, that govern their calculation for Easter and the resurrection of their holy scape goat Jesus Christ, even though he threw out the money changers...

The 33 stands for them being master masons, keepers of the secrets, that they themselves don't even know, they just keep them secret for as long as they can, because they fear the power of a united humanity.

Essentially the swearing in of the federal reserve act, put them in the position to create as much money, currency, current-sea, fluid cash flow, liquidity... like a Zero point technology, that at the time Tesla was designing in his laboratory... Free energy? Has the Sun sent you bills in the post recently? For all the light shining upon this blessed realm of Mother Earth, the light mirroring the light of the millions of other Suns in our Galaxy alone...

They had to keep a tap on good old Tesla, electrical genius, so at the same time, they placed another tap on the creation of the money supply, because they think there always needs to be a hierarchy in control of everything, and if not chaos would occur...

Looking around now in the year 2015, we can see that this tap on the flows has really worked in maintaining a peaceful world... NOT

Most folks think it's all about it being connected to the removal of the gold standard, but that's just another rich persons' commodity. No, the real value in the money supply is the realization that its leads to a moneyless society...

Like the scaffolding builders place around a house in the process of it being created, it's necessary to create a society that learns to live together in equality, but only when the money supply is valued, and seen for what it is, our own creation, we decide how it is!

However, if the true meaning is hidden from us and we think it's always going to be this way, every one fights for as much as they can get, and no ones really wins...

Money supply is like the water required for sapling trees. You have to water them, and plant them until they are self-sustaining; you can't rush the process, as that goes against the natural flow. In the same way, we are all potentially self-sovereign beings, and it should be the purpose of the currency to keep watering us to become the masters of whichever natural creative task we feel we are best at.

Teacher, builder, writer, actor, designer, gardener, researcher, engineer... They all have their purpose, which one is more valuable?

Does comparing help our unified reason for existing?

Does it help everyone to get to where they are meant to be by their own measure of their intuition as to what their natural

strengths are, and do we support each other enough to be able to even realise this?

In the "dog eat dog", "every one for themselves", rat race, human race, yet to be humane is to understand the challenges of our fellow human beings and do something to alleviate the suffering,

Bringing us back to the basic essentials...

Shelter, food, clothes, clear air, clear water, warmth, the basic essentials are all we need

& true richness is of the Heart & caring!

The rest is all a personal choice. Society should organize itself for minimal necessities maintained by a caring and efficient population, using the most advanced (but actually known for thousands of years) technologies, so we become planetary gardeners, not planetary slaves.

A graphic I made (*see next page*) to show how the current political climate can be rearranged to reflect these values of maintaining an efficient society... Less jobs, more responsibility!

Though am sure those that have given up their lives to slave jobs won't be up for giving up their privileges... Yet the time for playing in the sand like children, that time is up!

*Extra note * re: Psychotic economics

The symbol is the boat on the high seas, but
who builds the boats, and if you could
afford to own many ships, what happens if
one of your ships goes down?

As the owner if you didn't really care about
the loss of life, what would you do about it?

Do you help the folks families who died?

is natural to give & receive
borrow & return (we all do it)
the problem is when stupid
levels of interest is added
* like a boat taking on
too much water * IT SINKS !

Well you would most likely just pay someone
to build another ship, and off you go... cut
your losses and re-launch.

This is actually how "they" run the show,
they don't care, the option is always there to
go bankrupt at any time, be bailed out
(when loses or debt/depths are too great),
as when your ship goes down, or in
symbolic form goes into so much debt it
cant stay afloat. Its taken on too much
"water" or debt "currency".

However having the awareness of knowing
this in foresight, as in knowing this before
you even build your 1st ship, its basically a
get out of jail free card, that "they" always
keep up their sleeves... in the money Game.

And the world continues to be enslaved to
this total lack of awareness of the maths.

Its my view that they purposely make maths
boring so no one learns the ropes...

Afterword

Time is indeed of the essence (but only in a world caught in the illusion of linear time, would there be such a rush to fix something that is so apparent as aligning to natural time, and valuing ecological principles over economic profits).

Yet the time is fast approaching when the rivers and oceans, the very air we breathe, and environment we live in reach their toxic limit.

On a metaphorical level, it can be plainly seen that not aligning with a naturally based timing system has led to a planetary society that puts profit before people, profit before planet, and we pay the price...

So instead I would say...

Time is the essence ! ... numbers !

i.e. without correctly living in naturally based time, we are living in a broken system that requires constant fixing.

Traditions that use the 19-year cycle (calendars)!

Examples of ancient cultures using a 19 year cycle (with no mention of flower of life geometry):

Babylonian (19 years of 12 moons, plus 7 moons, 6x Adaru, 1x Ululu)

Bahai (19 years made up of 19x19 days, plus 4 or 5 extra days)

Byzantine (Easter computus = 19 year cycle, 19x12 + 7 = 235 moons)

Chinese (19-year cycle, 12x12 moons + 7x13 moons)

Christian (Easter computus = 19 year cycle, 19x12 + 7 = 235 moons)

The Flower of Life in Time
19 year cycle = 6939.6 days

Greek (19-year cycle is known as the Metonic cycle, after Meton 432BC)

Macedonian (19 years of 12 moons, with 7 intercalary moons)

Mayan (difference between inscriptions marking 6940 days, 19 years)

"Evidence for the metonic cycle on Copacabana Stela A is associated with a text naming the Sun God (T1010) and the Moon Goddess (C7-D7; Pl. 20). Pairing their names in this fashion recalls couplets in the Chilam Balam of Tizimin that say *k'inil-uil*, meaning "the period of the sun, the period of the moon" (Edmonson 1982b:264 n. 10). As noted in Chapter 1, the contemporary Maya often pair the sun and the moon. On Stela A the pairing seems to refer to the sun and the full moon, for the Initial Series date of 9.14.19.8.0 12 Ahau 18 Cumku (1/28/731) falls on the full moon, and it is followed by the date 4 Ahau 18 Muan (9.14.19.5.0; 11/29/730), also the day of the full moon (a date recorded on Stela H). The Calendar Round 4 Ahau 18 Muan at E2-F2 may refer to the metonic cycle, because it is 9.15.0 days (6,940 days) after the Katun ending 9.14.0.0.0 6 Ahau (a date not given in the text). As Heinrich Berlin (1977: 75 -76) notes, this interval gives a value close to the solar year (365.263 days) and the lunar month (29.532 days)." p117 "Star Gods"

TESLA 'HARNESSES' COSMIC ENERGY

[Philadelphia Public Ledger](#), November 2, **1933**

"Inventor Announces Discovery of Power to Displace Fuel in Driving Machinery - Calls Sun Main Source

A principle by which power for driving the machinery of the world may be derived from the cosmic energy which operates the universe, has been discovered by Nikola Tesla, noted physicist and inventor of scientific devices, he announced today.

This principle, which taps a source of power described as "everywhere present in unlimited quantities" and which may be transmitted by wire or wireless from central plants to any part of the globe, will eliminate the need of coal, oil, gas or any other of the common fuels, he said.

Dr. Tesla in a statement today at his hotel indicated the time was not far distant when the principle would be ready for practical commercial development.

Asked whether the sudden introduction of his principle would upset the present economic system, Dr. Tesla replied, "It is badly upset already." He added that now as never before was the time ripe for the development of new resources. While in its present form the theory calls for the development of the energy in central plants requiring vast machinery, Dr. Tesla said he might be able to work out a plan for its use by individuals.

The central source of cosmic energy for the earth is the sun, Dr. Tesla said, but "night will not interrupt the flow of the new power supply."

EARTH UNDER "QUARANTINE"

To protect galaxy from amnesia virus, brought here by alien race, living through now as the false "ruling" elite bloodlines, game-over!

As only that which resonates with Love (flower of life in "geometry"), can pass through, ... beyond the veil of illusion ... Only those who are of Love and Peace will prevail ~ the eternal ~ OM !

Completion

Weaving together the ancient Mysteries

The camel carries a great burden indeed

but the thread is strong and true ~

Only the gap in our consciousness

remains narrow ~

Though, through the reflections

upon these codes of time and space

that gap widens anew ~

While deepening ~ at the same time ~ synchronously as one

As we see into Solar and Galactic realms

(the as "above" macrocosm)

and also the Earth and Lunar realms.

(the so "below" microcosm)

Our place between them

bridging the visible and invisible

The past and future becomes one ~

and as they spiral into each other

from this place called NOW ~ it is and ever shall be...

Here and Now is where we pick up the thread to weave

the only real time, Yet contains them all

where we find all potentialities ~

As we grasp for it

*it ceases being infinite
and becomes a singular choice ~ a decision ~ finite*

The act of creation taking place

in front of our 2 eyes ~

We are given the gift to see all of Infinity

and with it comes the responsibility

to choose good.

That which serves life energy

supports the collective ~ all that is

and as we are indeed greater than

the sum of our parts

together we are surely stronger ~ as it could be

but only with strong foundations

we the people are this root and should be Free !

The root being 4 edges, at the base of the pyramid

as it sits upon the Earth in tranquillity

Holding in place the circle and cross

of the natural 4 directions

Earth Water Fire Air

(ashes to ashes - dust to dust / spirit to spirit - soul to Soul)

Together within the great Æther ~ at pyramids peak...

which can also be ~ found deep within ~ the heart <3

As we are made of the same star dust !

*that is created when stars become supernova !
formed themselves eons ago away in distant nebulas ~*

Giving birth once more to the particles of life ~

A continuous recycling ~ recreation ~ renewal

Holding us in the embrace of

the Great mother universe !

As she dreams us we dream her

our consciousness

awakens !
