

19,000 Years of Peace

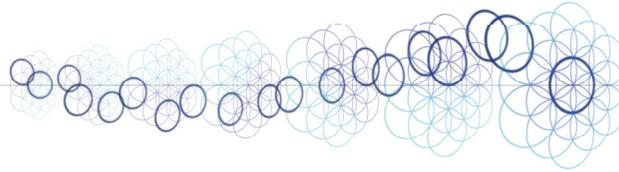

19⁰⁰⁰ Years Of Peace

&

the Missing Piece...

a shard of truth.

by Raah Psirus Heimdall Kaborn

An ancient cycle...

known to all cultures in tune with the moon
its secrets long forgotten, remains secreted away

lost in linear time...

Found again as

The Flower of Life in Time

the cycle complete

we are one ~ Earth tribe !

we are many ~ traditions !

Synopsis

How was it that the Flower of Life in Time came to be and returned to planet earth?

I first saw the image known today as the Flower of Life, in what was most likely seen as an obscure "new age" text back in the 90s, first published in 1994. The title goes something like this: "Nothing in this book is true, but it's exactly how things are".

This book describes, among many other topics, a variety of the basic geometries that produce the Seed of Life, the Tree of Life, the Fruit of Life etc. The Flower of Life forms the matrix with which the platonic/perfect solids are born, and when these are all united together and interlocked, this then forms the Metatron's cube.

From this I went on to include the visualizations of geometry in my meditations, activating these geometries within my chakras, with chants and specific vowel sounds. During this time I participated at the Healing Sounds Intensive in Colorado (www.healingsounds.com).

relation of musical notes to time cycles

Then, a few years later on, were published the Flower of Life books of Drunvalo, both monumental books that expand on so many

levels these Flower of Life teachings, and for me more meditations followed through studying these books. Particularly did I focus on the Merkabah geometry, and from this practice a great remembrance of ancient wisdom and revelations came to me, as I am sure did with most kin that read through these books.

I went on from this to become involved with the "13 Moons of Peace" movement (calendar change advocates - www.lawoftime.org), which bases itself on realigning to the 7-day week (Seed of Life / 7 plasmas) within the proper 28 common law month, making 13 months of 28 days per year (+1 day) = 365. This concept was introduced to me by the pioneering work of Dr José Argüelles, and his book "The Mayan Factor".

* I call the 28-day cycle a "[Geometric month](#)" in my own research

This all eventually led to me starting my own independent research, and it was from this that the "Flower of Life in Time" came to be. Through deeply studying the structure of the 19-year cycle and ratios through time I saw first the ratio of 7:12 (12 around 7), and then later the ratio of 1:6:12 that unlocked its fractal core, to form a Cube-Dodecahedron, sharing a common centre, merged to form the geometry of 19 years. *see graphic: "Meta 19" on [page 21](#)

This research then was paramount in making possible my 19 years study of cycles of time (using the StarCalc program). From this place of understanding time through both the geometric & organic based systems, I mapped over 1000 of these 19 years cycle and showed their fluctuations around the primary 19 years base formula... *Organic term was developed later through my long term study of the Mayan Long

Count of 1872000 days, and for example includes the Fibonacci ratio and therefore Phi = 1.618. ($144 / 89 = 1.618$)

*New information coming to light *

In the past few years, there has been new information coming to light: Utilizing things like the atomic force microscopy, the image of a "complex organic molecule" looking identical to a Fruit of Life was made public.

There are several pages online now showing photographic evidence, which provide many examples of the Flower of Life in art and architecture around the planet, the question now being: Is there a place around the planet where the Flower of Life geometry does not exist?

see: Traditions that use the 19-year cycle (calendars)

Then, more recently, there was also the nature of micro-tubules inside neurons within our bodies that have been hypothesized as "where the quantum world and the classical world of space-time meet". Relating therefore to new theories of the holographic / fractal structure of our beings, and the origins of consciousness.

All in all, we are seeing a resurgence of epic proportions!

A Planetary Awakening !

- Flowers of Life Around The Planet (images) - p145
- Further Reading - p147
- About Me - p153

CHAPTER 6

Ancient Cosmology (infinity codes)

Moving on from the overly apparent hijacking of the "system" by the world management team, with their smoke-and-mirror tactics, I was to find out that it would be necessary to create an entirely new system of time.

Through the process I was to realise that I was really just re-discovering what our ancestors already knew, but had been lost down the corridors of time by the knowledge hoarding and book burnings.

Yet in order to take this mammoth understanding of Infinity to the next level, I had to piece together various loose threads of ancient wisdom to see the full picture.

There are many aspects to understand in order to see this more complete picture, and they go as follows:

The Geometric 8-fold Year is based on exact units of measure (masculine archetype).

The Organic 8-fold Year is based on real-time events (feminine archetype).

The Fibonacci Year sequence was to be revealed to me by studying the already existing Organic year for further clues.

This then leads into the Zenith year, which is another version of a Geometric Year, but based on 7 parts instead of 8 (as it is based on the Mayan Long Count).

I've dedicated a small section in this Chapter to each one of these key matrices, and they are required reading in order to then understand the vast cycles of the Long Count, Time-lines and on into the Infinite cycles of what I was to later term the Celestial DNA Time Spiral.

The idea of 19,000 Years of Peace is founded on the alchemy of all this wisdom, and so that all the traditions can see we have far more in common than what separates us apart.

The Geometric Year (8-fold)

This graphics shows the geometric side of time that is usually referred to when speaking about the 4 seasons of 13 weeks:

Spring, summer, autumn and winter. Each being made up of a total of 91 days: $4 \times 91 = 364 (+1) = 365$

At the centre of the graphic is the Pyramid of Kukulcán at Chichen Itza.

This pyramid of the Maya has 91 steps on each side, plus an extra step at the top to enter the chamber at the pyramids peak $(91 \times 4) + 1 = 365$ steps/whole days per year.

As a pattern, this geometry of time allows for interlocking sequences of the 7-day-week, and 13-month-year. This can be understood though the outer ring of 52 segments.

There are 52 weeks per geometric year
 (+1 day to complete the year) = 365 days

There are 13 weeks per geometric season = 91 days

There are 4 weeks per geometric month = 28 days

The inner section of the main graphic shows the year divided into 8 parts, making it the geometric reflection of the solstices and equinoxes, plus 4 fire festivals.

This would be made up of:

$8 \times 45 \text{ days} = 360 (+ 5) = 365 \text{ days}$

Four of the extra days are positioned at the midpoint of the 4 seasons (46th day of 91).

*see little stars around edge of inner section

The 5th star is the (+1) extra day, the day before the winter solstice, and is placed here

in order to align the geometric year with the organic year matrices together.

This is done by first finding the axis of symmetry from the shape of the year in the organic, and then merging this with the geometric symmetry. They both interlock with each other from this anchor point of the (+1) day.

* In our current age this axis of symmetry runs along the Solstice line

I have also included an extra 6th star in the position of the Autumn Equinox, to identify the time when personally I feel leap days should currently be added.

* see section on leap-day for calculations

This could be done simultaneously in either geometric or organic matrix (currently there is a +/- 2 days difference).

However since they are both aligned at the winter solstice (+1) anchor point, and would be using the same leap-day rule, their long term trends would remain balanced and in tune with each other.

ancient-cosmology

Infinity-codes.net

The Organic Year (8-fold)

This graphic of the Organic version of the 8-fold year was done to highlight its connection with what I call the 'shape of the year' or 'egg-shaped' orbit.

Instead of the seasons having exactly the same lengths based on equal measure, they show their lengths in reality, based on naked eye observations.

These naked eye observation, like for instance the Sunrise on Equinox being exactly due East are no different than what can be calculated with the many satellites in geo-synchronous orbit around our planet.

(Though using satellites to work it out may be more fancy, it is entirely un-necessary)

The lengths vary from 44-47 days, but are contained within a holistic sequence, and are all based on whole day count observations, just like our ancestors would have done in order to calculate the true number of days between the solstices and equinoxes, plus 4 fire festivals.

The results of these observations would have been enough for our ancestors to realise that the planet was in an elliptical orbit as it spirals around the Sun.

In fact, it is very close to perfectly circular, but not quite, and the slight difference is where most researchers just glance over this and move on.

However, hidden within it is a grand mystery, which can be extrapolated from using the numbers of the Fibonacci ratio to create a mathematical formula for the inner and outer aspects of time. *see next section for Fibonacci codes

The inner and outer aspects of time could also be explained as personal and collective, or individual and planetary, as above so below...

The key that led to my understanding the relationship to the Fibonacci sequence is the number 89. * see Pine cone

The numbers that come out as the answer from this investigation produce a beautiful natural progression and renewal, as:

$$44, 45, 46, 47 \sim 47, 46, 45, 44, (+1) = 365$$

$$\text{where } 44+45 = 89$$

$$\text{and } 46+47 = 93$$

* The seasons are accurate for the Northern Hemisphere, with the Southern Hemisphere being a perfect mirror of this

- Spring North = Autumn South
- Summer North = Winter South
- Autumn North = Spring South
- Winter North = Summer South

The Fibonacci Year (phi-ratio)

It is an absolute pleasure to be sharing this piece of the puzzle, as its remembrance will surely revolutionize our whole understanding of a great many things. What you are looking at is a year based on the ratios of the Fibonacci spiral, which goes as follows:

$$0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144, \dots$$

$$144 / 89 = 1.618 \text{ * rounded "phi"}$$

The way that I have arranged the numbers is so that they create both an inner time matrix and outer time matrix.

Inner time (geometric) matrix: The first 6 numbers from 0-5, equal:

Zero = centre from which everything is born, and to which everything returns

$1+1+2+3+5= 12 =$ "12 month" time systems

When the zero point (centre) is included, it enables the "13 month" time systems as 0-12 equals thirteen positions.

Outer time (organic) matrix: The next 7 numbers from 8-144, equal:

$$8+13+21+34+55+89+144 = 364 \text{ days}$$

$$(+1) \text{ to complete the year} = 365 \text{ days}$$

Anchoring the start of the outer time matrix at the point at which the numbers lock into a symmetry of 89 and 93, can be shown thus: * measured in whole days *

$$144 + 8 + 13 + 21 = 186 = (2 \times 93)$$

$$34 + 55 + 89 = 178 = (2 \times 89)$$

* It was monumental sign post that one of the numbers already matched up, i.e. the number 89

Therefore, plotting the numbers so that they sequence in the same way as our seasons currently do, with spring = 93, summer = 93, autumn = 89(+1) and winter = 89, we can find a very interesting start point.

The axis of symmetry in our era runs from summer solstice to winter solstice, the longer half (186 days) being spring and summer, and shorter half (178 days) autumn and winter.

Counting backwards from the Autumn equinox, the point where long half and short half meet, equals:

$$- 21 - 13 - 8 = - 42 \text{ days before Autumn equinox does the outer time matrix lock in...}$$

Autumn equinox 2012 = September 22nd @ 14:49 (figures according to Star-calc)

In the Mayan Long Count that is:
5 Oc (12.19.19.13.10) in 2012AD

and 42 days previous to that is:
2 Lamat (12.19.19.11.8) in 2012 AD

In the Gregorian that's: August 11th 2012

$$8 + 13 + 21 + 34 + 55 (+1) = 132 \text{ days}$$

This is also 132 days before the end of the current Long Count 20.12.2012 'the last day', and 21.12.2012 'the first day' of next Long Count.

Aug. 11th marks the exact point at which the Solar zenith occurs at Izapa in 2012, Izapa being the place where researchers say the Long Count began.

It is at this point in my own research that I had to ask myself: How much did the Mayans know? Since the codes of the Fibonacci spiral that exist as an average measure throughout the natural world and in the size and ratio of the human body... Leonardo Fibonacci lived between (1170-1250AD), and the Long Count began 3114 BC...

This Fibonacci Year describes the 'shape of the year' and organic year time matrix, based on ratios existing on a planetary level. As the Earth orbits the Sun, these resonant frequencies are continually being expressed to us - what a divine world we truly live in!

** In the graphic to the right, the Blue numbers show the symmetrical Fire Festival dates on the outside ring.*

** The Fibonacci year matrix is the Green area and contains the inner "Geometric" and outer "Organic" matrices together.*

The Solar Zenith (Geometric) Year

Next is the Solar Zenith year with its graphic dividing the year into 7 segments of 52 days (1 of which is $2 \times 26 = 52$). This is the inverse to the 52 weeks of the standard Geometric year.

In my time researching the origins of the Mayan Long Count, I found that many of the authors mention the realization that was reached at the sites existing on or near 15 degrees latitude North, for example: Izapa zenith cosmology.

The first place I ever saw this concept published was in a book by John Major Jenkins in 1998, called *Maya Cosmogenesis 2012*.

One of the peculiarities I've noticed with this Zenith cosmology is that it connects up with the 24 Elder Futhark runes, as the 15th rune is Algiz/Eiwaz. (Also $360 / 24 = 15$.)

"protection, invocation"

Within the tropics (between 23.5 degrees north and south), as well as having the standard 2 solstices and 2 equinoxes, the phenomena of the 2 Solar zeniths were also tracked, making a total of 6 key days

* In fact, the 2 Solar nadirs were also tracked making 8 days, but that's for another book...

In the research I've seen it stated that at or near the latitude of 15 degrees north, the Solar zenith occurs 52 days after the Summer solstice. I have confirmed this using modern programs like StarCalc (in fact, I confirm all my calculations several times to ensure accuracy)

In the graphic, the central axis runs from apex (Summer solstice) to root (Winter solstice), and 2 lines run from the centre up to the left and right, like someone standing with their arms raised, pointing in the direction of the times of the Solar zeniths.

The 52nd day after the geometric Summer solstice was the start point of the Long Count (3114BC) and has kept this lost secret hidden until now.

As mentioned before, this graphic is the inverse of the standard Geometric year, and therefore is also based on tracking the geometric alignments (symmetry).

In 3114BC, the dates of the key alignments that we are working with here are as follows.

This is the point when other researchers' work goes no further in clarifying the exactness of the Mayan time science, and the point at which the infinity codes investigation began to shine really bright.

Key alignments in 3114BC

>> Geometric Summer solstice = 21 June (5 Muluc)

>> Organic Summer solstice = 23 June (7 Chuen)

>> Geometric Solar zenith = 11 Aug (4 Ahau)
= Julian day number of **584283**

>> Organic Solar zenith = 13 Aug (6 Ik)
= Julian day number of **584285**

In both cases, there are 52 days (inclusive) between these points, counting from Geometric point to Geometric point, or counting from Organic point to Organic point.

Due to the shape of the year being warped towards the Spring equinox in 3114BC, as the Aphelion was close to the Spring equinox in that era, this then creates the 2

days difference you see between the Geometric and Organic points

* See later on in this book for more info on the 58-year-shift

It can also be understood that in our current era, the shape of the year is warped towards the Summer solstice, again with the Aphelion being close to it, making the 2 days difference occur at the Spring and Autumn equinox, instead of Summer and Winter solstice, as is the case in 3114BC.

* The axis has therefore shifted approximately 90 degrees over the period of 1 Long Count

This page lays down the foundations on which the Mayans, in their vast knowledge of the great cycles of time, anchored the Long Count on the Geometric Solar zenith (not the Organic zenith as one would presume).

The discrepancy is also the reason why the 2 main Julian day numbers of 584283 and 584285 have existed in the Mayan research, and why so much was argued about which was the right one, however no one had the idea that maybe they both were right and that the Mayans were using a dynamic system of time that took into account both the Geometric **AND** Organic.

Geometric & Organic matrices

These terms Geometric and Organic are terms I've come up with myself - I needed to do so as there was no one else disclosing such theories.

Anchoring the Long Count on the Geometric Zenith and not the Organic, was done so that in the future, in our era, and in the year 2012, when the Geometric and Organic Solar zeniths have combined (due to the shift in the position of the Aphelion), the Long Count could complete exactly on the geometric Winter solstice (Dec 20th {the +1}) and the next Long Count could begin on the Organic Winter solstice - 4 Ahau (Dec 21st 2012).

The fluctuations of using both Geometric and Organic systems allow a fuller picture to form and a more accurate timing system to be followed, indeed accurate enough, it seems, to be able to predict the exact occurrence of the Solstice Sun crossing the Galactic equator 5125 years in the future!

I dedicate this realization to the wisdom of our ancestors !

May we all remember that our roots are truly planted in the hearts of absolute genius !

In conclusion, here is a graphic I created to summarize this particular aspect of the genius of the Mayan Time Science. It also shows the relation of the Fibonacci ratio to 1 year, anchored at the geometric Solar zenith.

(To re-emphasize: Did the Mayans also know of this ratio long before us?) And therefore long enough before 3114BC in order to work it into their calculations?

Surely that would mean several thousand years of investigations in order to figure out the calculations first before creating the 5125 years time sequence, but then that goes against the modern held view that we live in this supposedly advanced age...

I think the science I am describing here is pin pointing evidence of a lost ancient world culture, or at the very least an advanced ancient culture in the Americas... Atlantis?

Spiral matrix of nature - Alchemy of geometric and organic years

$$8 + 13 + 21 + 34 + 55 = 131 (+1) = 132 \text{ days}$$

Number of days from Geometric zenith to Organic solstice 2012, the number of days extra on top of the 5125 years in order for the Long Count formula to balance out.

1 Mayan Long Count lasts

$$\begin{aligned} &5,125 \text{ years} + 132 \text{ days} \\ &1,872,000 \text{ days} \\ &- 132 = 1871868 \text{ days} \\ &= 5125 \times \underline{365.2425} \end{aligned}$$

How surprising it was to find out, at the end of so many years of investigations, that between the years of 3114 BC and 2012 AD, the average length of year that was only adopted by the Catholic Church after they

colonized the Mayas, was the same length of year the Mayas highlighted in the last Long Count sequence.

* With the apparent decrease in the length of the year by 1 second per century on average, this would mean that over 1 Long Count the length of year would decrease by 51.25 seconds approximately.

It would also mean that at the start of the Long Count beginning 3114 BC the length of year was:

$$\begin{aligned} &51.25 / 2 = 25.625 \text{ seconds} \\ &25.625 / 86400 = 2.966 (\times 10)^{-4} \\ &365.2425 + 2.966 (\times 10)^{-4} \\ &= \underline{365.2428} \text{ day year (rounded)} \end{aligned}$$

At the end of the last Long Count at 2012 it would result in:

$$\begin{aligned} &\underline{365.2425} - 2.966 (\times 10)^{-4} \\ &= \underline{365.2422} \text{ day year (rounded)}, \text{ and this also} \\ &\text{matches the year length as it stands today} \\ &\text{according to most modern estimates.} \end{aligned}$$

Coincidence?

:-) or universe as living library of synchronicity...

Perhaps we have here evidence of lost ancient wisdom being stolen by the conquering nations - why am I not surprised...?

Looking back over that last equation, the number of seconds in the decrease of the length of the year over half a Long Count

$$= 25.625 \text{ seconds}$$

This is a precise fractal reflection of the number of years in 5 x 5125 years of each Long Count

$$\underline{25.625} \text{ for 5 Long Count}$$

25.625 seconds decrease of year length over 1/2 Long Count

This number 256 can also be seen to be part of the binary grow pattern...

$$1 : 2 : 4 : 8 : 16 : 32 : 64 : 128 : 256$$

Do we actually live in a Holographic reality?

* The chart provided on page 83 gives the Zenith dates for Izapa, Palenque & Teotihuacan (years 100AD-1500AD) ~ showing the exact dates of the Organic zeniths fluctuating through time...

52 year cycle of the Mayans (& Solar zenith year)

Over the course of my studies into Mayan cosmology, I learnt that one of their most important and sacred cycles they honoured and celebrated was the cycle of 52 years. This cycle has also come to be known as the "calendar round", and was marked by a "new fire ceremony" to start the next cycle.

As a cycle of time it represents the time for the Haab (365 days) and Tzolkin (260 days), to resynchronize to day 1 in both counts.

Schematic representation of part of the 52-year Calendar Round.
<http://blog.world-mysteries.com/science/ancient-timekeepers-part4-calendars/>

*sample of Tzolkin cycle of 260 days with Haab cycle of 365 days (external [link](#))

$$365 \text{ (Haab)} \times 52 = 18,980 \text{ days}$$

$$260 \text{ (Tzolkin)} \times 73 = 18,980 \text{ days}$$

During my time in Mexico in 2000, I stayed at Chichen Itza for about a week. I had planned to be there after previously reading a book by John M. Jenkins called "Maya Cosmogenesis 2012" (an awesome book!). So it was that on the day, the Day of No Shadows, as it was the Zenith day ~ Yellow Rhythmic Human - 12.19.7.4.2 - 8 Ik (WInd): May 20th (Gregorian), I was within the Pyramid of Kukulkan at midday in deep meditation at a Mayan ceremony for the Solar Zenith alignment with the Pleiades. It was a great honour to be there, and I was lucky to have shared time with the Mayan elder leading the ceremony about a week before for several days of one-to-one tutorials on Mayan cosmology.

* This is where my Spirit name "Hun Kuk'um" originated, through my vision of the One White Feather (of peace and sacred intent) during an initiation with the Mayan Elder.

Chichen Itza - Pyramid of Kukulkan
(of the feathered rainbow serpent)

During my investigations into the alignments of the Sun with the Pleiades at Chichen Itza, I used StarCalc to determine the nature of that alignment on the day I was there. It lined up perfectly, so amazing! However, only when the Ecliptic (pink line) was at right angles to the line connecting the Sun and the Star, in this respect it was the Pleiades star cluster and its brightest star Alcyone. This alignment was brought to my attention first by the statement of John Major Jenkins in his book (p. 74): that May 20th was 'the date' of the solar zenith during our era.

http://infinity-codes.net/raah/_archive/52-mayan-cycle.html

Coordinates of Chichen Itza

20° 40' 58.44" N / 88° 34' 7.14" W
20.68290 N / 88.56865 W

Sky above Pyramid of Kukulcan - overtone monkey : 7 imix : May 19th (Gregorian)

{ALIGNED with NORTH / SOUTH axis} but not Ecliptic ...

Sky above Pyramid of Kukulcan - rhythmic human : 8 ik : May 20th (gregorian)

In the images above you can see the central star of the Pleiades - Alcyone having its closest alignment with the Sun on the North / South axis on May 19th, whereas on May 20th it is aligned with the Ecliptic. Having a further look at the years after 2000 running up to 2012, I found that it was only once

every 4 years that the Sun and Pleiades aligned exactly to the minute with the North / South axis.

2000 was a perfect year for the ceremony, as it was aligned according to the Ecliptic (see first StarCalc graphic). Below you can see the alignment pattern of 4 years in the Time diff. - 0m with regard to the North / South axis alignment.

The Pleiades - Star Cluster (also known as the 7 Sisters)

Table - Zenith times of the Sun and Alcyone (with the North / South axis)

| Year | 2000* | 2001 | 2002 | 2003 | 2004* | 2005 | 2006 | 2007 | 2008* | 2009 | 2010 | 2011 | 2012* |
|-----------|-------|-------|----------------|-------|-------|-------|----------------|-------|-------|-------|----------------|-------|-------|

| Sun | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 | 11:51 |
| Pleiades | 11:51 | 11:52 | 11:53 11:49 | 11:50 | 11:51 | 11:52 | 11:53 11:49 | 11:50 | 11:51 | 11:52 | 11:53 11:49 | 11:50 | 11:51 |
| Time diff | 0m | 1m | 2m | 1m | 0m | 1m | 2m | 1m | 0m | 1m | 2m | 1m | 0m |

*Because of the disruption caused by our world continuing to use the Gregorian leap-day system, alignments vary in regard to which "calendar" day they fall on.

All of these calculations are being made via the program StarCalc, available for [download here](#). This program is an excellent tool for determining exact alignments, and it has enabled me to do extensive research into many elements of the {time codes}.

Continuing this investigation into the larger cycles of 52 years, I will refer back to the information contained in the page on the 33 year Diamond:

$365 + 365/1507 =$ Mayan leap-day cycle of 1507 years, length of year = 365.24220...

This cycle of leap-days can be showed to be based on calculating the length of the year from the Sun rising East at the [Spring equinox](#) (using StarCalc), as the average length of the year during the centuries of the current Long Count (3114-2012) are:

| |
|----------------------------|
| 3000BC – 2000BC = 365.2422 |
| 2000BC – 1000BC = 365.2422 |
| 1000BC – 1AD = 365.2422 |
| 1BC - 1000 AD = 365.2423 |
| 1000AD – 2000AD - 365.2423 |

Thus the calculations of the program StarCalc back up the calculations made by the ancient Mayans and vice versa. It is results like these that have empowered me to delve further to see the exactness of what our ancestors beheld. They used Stone circles and Pyramid alignments, whereas we today are more prone to use Satellites or Telescopes.

Regardless the results are the same, and it is this fact that shows indeed that modern science is catching up with ancient knowledge. Meanwhile the mainstream is still lost in linear time, following an outdated 'calendar'!

Conclusion - the exact science of the ancient Mayans

Within the larger cycle of 1507 years that the Mayans used to calibrate their leap-days, there are:

1507 Spring equinox years
 = 1507 x 365.24220305242
 = 550420 days

1508 Haabs = 1508 x 365 = 550420 days
 {{or 1507 Haabs + 365 leap-days = 550420 days}}

2117 Tzolkins = 2117 x 260 = 550420 days

29 New fire ceremonies = 29 x 18980 = 550420 days

* please note here that there is a difference between the length of Spring equinox years within a given century, and the overall length of the geometric spring equinox year calculated over 20,000 years (explanation soon to be uploaded)

arrangement of Time/Space codes
 by Raah www.infinity-codes.net

In service to Universal Peace!
 In lak'ech ~ Ah lak'in

The lifetime of Pacal, including all dates in both Traditional Mayan and Dreamspell

Long Count date: 9.9.2.4.8 equates with origins of Palenque Zenith cosmology, Chilam Balam traditions etc (on 27/07/615)

It being founded on a fluctuating Organic Zenith date (not geometric) means that the date of 13 Moon New Year would follow this shift..

*** Final proof that the fixed Gregorian calendar (26/07 ideology) is to be transcended by ancient leap-day wisdoms of the planet! In 2016 New Year has moved to **25/07**

The Alchemy of Movement and Measure

Another way of putting it could be Organic and Geometric... Melody and Rhythm... Time and Space...

Stonehenge Investigation

{further evidence of an ancient planetary culture}

Mystery of the Station stones...

It was through an investigation of the alignments of Arthur's Seat that I found the angle of 22.65° by dividing the total degrees of change between northern most and southern most risings and settings by 4.

This investigation continues with the sacred site of Stonehenge. The coordinates of which are:

51.18° N / 1.83° W

During my investigations of Stonehenge in relation to the 4 fire festivals: (*Beltane, Lughnasa, Samhain and Imbolc*), a set of stones, 2 of which are said to mark these days, are spoken about a great deal, with varying opinions.

Another well-known sacred site called Newgrange in Ireland also marks these key dates, as do many others, but I haven't had the "time" to investigate all of them in great detail yet...

One opinion is that these stones, called the Station Stones (*stones 91, 92, 93&94*), signify a perfect rectangle of 12 units by 5 units, with a diagonal length of 13 units.

<http://infinity-codes.net/n.t.f.m./organic-year-investigation.html>

Graphic showing 12 by 5 rectangle of the Station Stones at Stonehenge

External link for more info: ancient-wisdom.co.uk

There are many pages on the internet talking about this 12 by 5 rectangle, but are they in an exact rectangle in reality?

The stones that remain at Stonehenge are few compared to the original, but detailed maps and measurements have been taken.

To add further weight to the reality of their original exact position (as over time some of the stones have fallen over or been removed), here is a diagram showing their measured lengths and angles:

It's pretty much an exact 12 by 5 rectangle, just slightly off (and for a reason)...

The measurements used in the above graphic can be found on this external link (p. 13):

[Station-Stones-of-Stonehenge](#)

$$89.5 + 89.5 + 91.1 + 91.1 = 361.2$$

$$361.2 / 4 = 90.3^\circ$$

$$80.4 + 34.7 + 79.9 + 32.7 = 227.7 \text{ meters}$$

= perimeter of Station Stones

$$227.7 \text{ meters} / 0.2992 \text{ m}$$

$$= 761 \text{ Egyptian pyramid feet}$$

This length connects Stonehenge to exact length of 1 side of the Great Pyramid

* To see how the perimeter of the Station Stones connect Stonehenge to the Great Pyramid, [see website](#).

To summarize in comparison so far:

Arthur's Seat = total angle of change = 90.6°

and $90.6 / 4 = 22.65^\circ$ is +0.03 off the angle created from a perfect 12 by 5 rectangle (see graphic below)

Whereas at Stonehenge:

Station Stones = average of 4 angles = 90.3°

and $90.3 / 4 = 22.58^\circ$ is -0.04 off the angle created from a perfect 12 by 5 rectangle (see graphic below)

$$\{\tan^{-1} (5 / 12) = 22.62^\circ\}$$

The 2/3 (0.666...7) way markers

At the latitude of Stonehenge the northern most sunrise, at Summer Solstice, rises at:

40.7° North of East and the Sun sets at 40.7° North of West.

The southernmost sunrise, at Winter Solstice, rises at:

38.1° South of East and the Sun sets at 38.1° South of West.

The total degrees of change between mid-summer and mid-winter therefore equals:

$$40.7 + 38.1 = 78.8^\circ$$

The diagram below shows the above calculations in a radial format (eagle's view / top down).

Included are the 2/3 (0.666...7) way markers from exactly East and West (both as 0°).

$$40.7 \times 0.666...7 = 27.13^\circ$$

$$38.1 \times 0.666...7 = 25.40^\circ$$

In blue are the dates on which these alignments occur relative to Stonehenge.

In grey are the number of days between each respective alignment.

* see next page for exact dates of Stonehenge (large graphic)

Stonehenge Fire Festivals

The longer section in which there are 47 days indicates that the season in which it occurs (Summer solstice to Autumn equinox) is where the Aphelion is currently positioned (Jul 5th).

In each case the Azimuth is aligned closest to either 115.4 & 297.1 angles

Below you can see the alignments on the dates the cross-quarter days are in our current era, and how they are marked in relation to stones 91 & 93.

It can be understood therefore that Stonehenge still keeps track of the exact local times of the 8-fold-year for its latitude and longitude.

The graphic to the right is the only 1 out the 4 templates I've created in my Stonehenge Investigation in which these alignments fit.

*May 4th (Beltane eve) and
Aug 8th (Lughnasa eve) ~ Sunset*

Going into...

*May 5th (Beltane morning) and
Aug 9th (Lughnasa morning) ~ Sunrise*

(NOT May 1st / Aug 1st) as tradition says...

and...

*Nov 7th (Samhain morning) and
Feb 4th (Imbolc morning) ~ Sunrise*

Following on from...

*Nov 6th (Samhain eve) and
Feb 3rd (Imbolc eve) ~ Sunset*

(NOT Nov 1st / Feb 1st) as traditions says...

and whose tradition exactly ?

see: Where to place the leap-day?

(pages 51-53)

**Stonehenge Organic Template
2/3 way markers Version**

The calculations that create the above Stonehenge diagrams are based on knowing the true east/west axis.

The 2/3 (0.666...7) way markers being exact midpoints (* relative to cross-quarter days) between the northern most and southern most risings and settings and the true east/west axis.

On my [website](#) you can find 3 other examples in which these alignments don't match up with Stones 91 / 93.

I investigated these 3 other templates anchored at Stonehenge in order to add further weight to this investigation, and to show that this has been proven scientifically.

It is one of my favourite aspects of my work, the way modern science is proving the genius of our ancestors.

Like the Ouroborus serpent/snake biting its own tail, the tale or myth of an ancient forgotten planetary culture is being re-remembered... Though of course, some modern scientists aren't too happy with this, I reckon for most folks it's really exciting :-)

Reasons NOT to
change calendar

cant be bothered

“they” tried that before

the calendar is part of
our traditional fixed view

the POPE says we cant
and he is charge of
everything so we are
not allowed to...

there isnt the “Time”
to discuss such a minor
subject, the world has
far more important
issues to deal with

Afterword

Time is indeed of the essence (but only in a world caught in the illusion of linear time, would there be such a rush to fix something that is so apparent as aligning to natural time, and valuing ecological principles over economic profits).

Yet the time is fast approaching when the rivers and oceans, the very air we breathe, and environment we live in reach their toxic limit.

On a metaphorical level, it can be plainly seen that not aligning with a naturally based timing system has led to a planetary society that puts profit before people, profit before planet, and we pay the price...

So instead I would say...

Time is the essence ! ... numbers !

i.e. without correctly living in naturally based time, we are living in a broken system that requires constant fixing.

system upgrade : **

Opportunity for a
(+) planetary SHIFT

honouring ALL of our
ANCESTORS

respecting the Goddess
and caring for the

Appendices:

Traditions that use the 19-year cycle (calendars)!

Examples of ancient cultures using a 19 year cycle (with no mention of flower of life geometry):

Babylonian (19 years of 12 moons, plus 7 moons, 6x Adaru, 1x Ululu)

Bahai (19 years made up of 19x19 days, plus 4 or 5 extra days)

Byzantine (Easter computus = 19 year cycle, 19x12 +7 = 235 moons)

Chinese (19-year cycle, 12x12 moons + 7x13 moons)

Christian (Easter computus = 19 year cycle, 19x12 +7 = 235 moons)

The Flower of Life in Time
19 year cycle = 6939.6 days

Greek (19-year cycle is known as the Metonic cycle, after Meton 432BC)

Hebrew (19 years of 12 moons, plus 7 moons, Adar 1 & Adar II)

Macedonian (19 years of 12 moons, with 7 intercalary moons)

Mayan (difference between inscriptions marking 6940 days, 19 years)

"Evidence for the metonic cycle on Copacabana Stela A is associated with a text naming the Sun God (T1010) and the Moon Goddess (C7-D7; Pl. 20). Pairing their names in this fashion recalls couplets in the Chilam Balam of Tizimin that say *k'inil-uil*, meaning "the period of the sun, the period of the moon" (Edmonson 1982b:264 n. 10). As noted in Chapter 1, the contemporary Maya often pair the sun and the moon. On Stela A the pairing seems to refer to the sun and the full moon, for the Initial Series date of 9.14.19.8.0 12 Ahau 18 Cumku (1/28/731) falls on the full moon, and it is followed by the date 4 Ahau 18 Muan (9.14.19.5.0; 11/29/730), also the day of the full moon (a date recorded on Stela H). The Calendar Round 4 Ahau 18 Muan at E2-F2 may refer to the metonic cycle, because it is 9.15.0 days (6,940 days) after the Katun ending 9.14.0.0.0 6 Ahau (a date not given in the text). As Heinrich Berlin (1977: 75 -76) notes, this interval gives a value close to the solar year (365.263 days) and the lunar month (29.532 days)." p117 "Star Gods"

Norse (19-year cycle, using younger Futhark of 16 runes, plus 3 more)

[Antikythera Device](#)

" The upper back dial is in the form of a spiral, with 47 divisions per turn, displaying the 235 months of the 19-year Metonic cycle. This cycle is important in fixing calendars."

Buddhist calendar

" seven extra months of 30 days are inserted in every 19 years (21 months in 57 years)"

Hindu calendar

" A lunar month has 29 or 30 days (according to the movement of the moon)."

" Extra Month, or *adhika māsa* (māsa = lunar month in this context) falls every 32.5 months."

$235 - 7$ (extra months per 19 years) = 228

$228 / 7 = 32.6$ months

Druid calendar

19 year cycle of Initiation...

[The Sequani Calendar](#)

" based on a 19 year cycle or the Metonic cycle"
" alternate between 30 and 29"

Islamic calendar

$(19 \times 354 + 11 \times 355) / 30$ year cycle = 10,631 days

whereas $29 \times 365.2424 = 10,592.03$ days

Yet Ouran full of 19 code...

TESLA 'HARNESSES' COSMIC ENERGY

[Philadelphia Public Ledger](#), November 2, **1933**

"Inventor Announces Discovery of Power to Displace Fuel in Driving Machinery - Calls Sun Main Source

A principle by which power for driving the machinery of the world may be derived from the cosmic energy which operates the universe, has been discovered by Nikola Tesla, noted physicist and inventor of scientific devices, he announced today.

This principle, which taps a source of power described as "everywhere present in unlimited quantities" and which may be transmitted by wire or wireless from central plants to any part of the globe, will eliminate the need of coal, oil, gas or any other of the common fuels, he said.

Dr. Tesla in a statement today at his hotel indicated the time was not far distant when the principle would be ready for practical commercial development.

Asked whether the sudden introduction of his principle would upset the present economic system, Dr. Tesla replied, "It is badly upset already." He added that now as never before was the time ripe for the development of new resources. While in its present form the theory calls for the development of the energy in central plants requiring vast machinery, Dr. Tesla said he might be able to work out a plan for its use by individuals.

The central source of cosmic energy for the earth is the sun, Dr. Tesla said, but "night will not interrupt the flow of the new power supply."

Completion

Weaving together the ancient Mysteries

The camel carries a great burden indeed

but the thread is strong and true ~

Only the gap in our consciousness

remains narrow ~

Though, through the reflections

upon these codes of time and space

that gap widens anew ~

While deepening ~ at the same time ~ synchronously as one

As we see into Solar and Galactic realms

(the as "above" macrocosm)

and also the Earth and Lunar realms.

(the so "below" microcosm)

Our place between them

bridging the visible and invisible

The past and future becomes one ~

and as they spiral into each other

from this place called NOW ~ it is and ever shall be...

Here and Now is where we pick up the thread to weave

the only real time, Yet contains them all

where we find all potentialities ~

As we grasp for it

*it ceases being infinite
and becomes a singular choice ~ a decision ~ finite*

The act of creation taking place

in front of our 2 eyes ~

We are given the gift to see all of Infinity

and with it comes the responsibility

to choose good.

That which serves life energy

supports the collective ~ all that is

and as we are indeed greater than

the sum of our parts

together we are surely stronger ~ as it could be

but only with strong foundations

we the people are this root and should be Free !

The root being 4 edges, at the base of the pyramid

as it sits upon the Earth in tranquillity

Holding in place the circle and cross

of the natural 4 directions

Earth Water Fire Air

(ashes to ashes - dust to dust / spirit to spirit - soul to Soul)

Together within the great Æther ~ at pyramids peak...

which can also be ~ found deep within ~ the heart <3

As we are made of the same star dust !

*that is created when stars become supernova !
formed themselves eons ago away in distant nebulas ~*

*Giving birth once more to the particles of life ~
A continuous recycling ~ recreation ~ renewal*

*Holding us in the embrace of
the Great mother universe !*

*As she dreams us we dream her
our consciousness
awakens !*

In lak'ech

Ah lak'in ~

Namaste ~

OM !

Coming soon...
